1836.

NINETEENTH  
ANNUAL REPORT, &c.

---

THE Managers of Friends' Asylum being desirous of spreading a more general knowledge of the superior accommodations it possesses for the care and cure of the insane, have, in conformity with the directions of the contributors at their late annual meeting, prepared for publication the following account of the institution:

The Asylum is situated in a healthy and retired neighbourhood, about six miles north-east from Philadelphia, and one mile west from Frankford, on a farm of sixty-two acres, about one-fourth of which is woodland. The buildings consist of a centre, sixty feet square, three stories high, with basement, having two wings each two stories high, and twenty-four feet wide, connecting with lodges at each end three stories high, presenting a whole front of three hundred and twenty feet, all of stone, and covered with slate. The patients rooms are commodious, and well ventilated and warmed by means of heated air. The lodges are used for the separate confinement of the violent and noisy maniacs, and are so constructed as effectually to prevent the other patients from hearing or being disturbed with the noise.

Those patients who so far convalescent as to be allowed the privilege, have access to the parlour, the Managers' room, the principal halls, gardens and grounds of the institution.

It has been found very difficult to adopt any uniform system of employment adapted to the different conditions of our patients; they are generally unwilling to engage in out-door labour, which is on all accounts the best. The Managers, however, under an entire conviction of the great benefits which result from constant exercise in the open air, endeavour to promote useful occupation among them. Such of the male patients who, from habit and health, are equal to the task, assist the farmer

and gardener in their various occupations; the female patients are employed in sewing, knitting, quilting, and other branches of housewifery.

To attract and fix the attention of all disinclined to useful occupation, considerable effort has been made: for this purpose, the introduction of animated objects being deemed beneficial, lambs, poultry, English rabbits, pigeons, &c. have been placed in the patients yards with good effect; and for such as may be detained within doors by the weather or ill health, materials for drawing and writing, books, popular periodicals with engravings, and a variety of articles have been provided calculated to interest and please them.

A circular rail-way of about four hundred feet circumference, located on the lawn in front of the building, has been constructed, with a car for two persons, to be propelled by themselves, affording at once amusement and exercise to those engaged, and occupying the attention of other patients.

Upon the morning and afternoon of each day when the weather is suitable, a carriage is in readiness to take those patients designated by the physicians through the pleasant rides of the vicinity.

With a view further to promote the comfort of the afflicted objects of their care, the Managers have directed the appointment of an officer of each sex, whose peculiar duty it shall be to strive usefully and agreeably to occupy the time and attention of the respective patients, in such manner as may be most conducive to the good of each individual—at the same time to seek and to cherish every returning ray of reason.

On the evening of the first day of the week, the patients, both male and female, (with the exception of those precluded by ill health, or necessity of seclusion,) are collected together in their respective day-rooms, where a portion of the Holy Scriptures is read to them. It is seldom that any interruptions take place; on the contrary, the silence and the quiet that reigns around is often remarkable.

The course of treatment pursued is one of mild and gentle, yet firm restraint. Towards every description of cases, whether the disease be of long or more recent duration, or whether the symptoms are mild or severe, the most soothing and gentle treatment is uniformly extended; the Superintendent and Matron,

with the Resident and Visiting Physicians, and Assistants, are thus enabled, in general, to obtain the confidence, and to secure a degree of discipline amongst those under their care, the accomplishment of which, by such means, is considered an object of primary importance; an opportunity is thus afforded for minute investigation of the peculiar character of each case, showing the medical remedies necessary to be employed as well as pointing out those essential moral auxiliaries, which sympathetic feeling, and an attentive observation of mental disorders, are calculated to suggest; steadily pursuing this course of management, it is gratifying to remark that the number of restorations during the past year has considerably exceeded that of any former period—a result which they believe is mainly owing to the additional facilities afforded for the employment, recreation and amusement of the patients.

The great facility of travelling throughout the United States removes the principal objection which formerly existed to sending insane patients to a considerable distance from home. The Managers, desirous of extending more widely the benefits of the institution over which they preside, would urge this consideration upon the attention of those whose connexions or friends may unhappily be afflicted with this affecting malady. The terms of board, it is believed, are as low as any similar Institution in this country, varying according to the nature of the case and the circumstances of the patient. The Asylum continues under the superintendence of John C. Redmond and wife, whose services continue to be satisfactory to the Managers—and the Medical department is entrusted to well qualified Physicians, one of whom resides in the house. Every department of the Institution is inspected weekly by a Committee of the Managers, and experience proves it to be of great importance that patients should be placed under care in the early stages of the disease, as by far the larger number of recent cases are restored or very much improved.

From the Physician's report it will appear that the whole number of patients under care during the year has been one hundred and eight—showing an increase in the number of admissions of 20 over the preceding year.

By the Treasurer's report a balance of \$313 78 remained in his hands on the 1st inst. The sum which has accrued from

the board of patients is \$10,459 80. From contributions and donations \$512 50, including a legacy of \$500 from our late friend Francis Wisely, deceased. The whole amount of expenditures for all purposes is \$10,683 58—\$1,000 of the loan having been paid off—leaving the debt of the institution \$11,100. In thus laying before the contributors the present improved condition of the Asylum, to whom its continued prosperity must be an object of deep interest, the Managers cannot refrain from expressing their conviction that the Asylum will not be deemed placed on a sure foundation until disencumbered of debt, and with its regular receipts fully defraying all its expenditures.

The produce of the Farm is as follows:—35 loads Hay, 500 bushels Potatoes, 190 bushels Corn, 158 bushels Wheat, 107 bushels Oats, 30 bushels Onions, 160 bushels Turnips, 30 bushels Ruta Baga, 90 bushels Parsnips, and 8 hogs weighing 1779 lbs.

*The privilege of admission into the Asylum is not now as formerly confined to those in membership or profession with the Society of Friends—the Contributors having at their annual meeting in 1834, authorised the admission of those not in connexion with the Society.*

## ABSTRACT

*From the Annual Report of the Physician to the Asylum, for the year 1835-6.*

During the year which has elapsed since the last annual report to the Managers, fifty-one patients have been admitted into the Asylum; which with the fifty-seven resident in the institution at the date of that report, make a total of one hundred and eight patients who have been under care within the last twelve months; being an increase of twenty over the preceding year, and greatly exceeding the number of those, who, during any other former year participated in the advantages which the institution offers for the treatment of this afflicting malady. The average number since last report, as per monthly enumeration, is fifty-one and seven twelfths, and the number discharged or died, sixty-two. The following classification is in accordance with that adopted in the last annual report.

## FIRST CLASS.

|                                                                                       |      |
|---------------------------------------------------------------------------------------|------|
| Patients whose disease was under three months duration,<br>and the first attack,..... | 10   |
| Restored,.....                                                                        | 5    |
| *Much improved,.....                                                                  | 3    |
| Improved,.....                                                                        | 1    |
| Died,.....                                                                            | 1—10 |

\* Two of the three reported as much improved, were removed by their friends when nearly well, and entirely recovered soon after.

## SECOND CLASS.

|                                                                                   |      |
|-----------------------------------------------------------------------------------|------|
| Patients whose disease was over three months duration,<br>and within twelve,..... | 15   |
| Restored,.....                                                                    | 8    |
| Much improved,.....                                                               | 2    |
| Improved,.....                                                                    | 2    |
| Stationary,.....                                                                  | 2    |
| Died,.....                                                                        | 1—15 |

Of the fifteen, three were labouring under a second attack.

## THIRD CLASS.

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| Patients whose disease was of more than twelve months standing, and within two years,..... | 7   |
| Restored,.....                                                                             | 2   |
| Much improved,.....                                                                        | 1   |
| Improved,.....                                                                             | 1   |
| Stationary,.....                                                                           | 2   |
| Died,.....                                                                                 | 1—7 |

## FOURTH CLASS.

|                                                                  |      |
|------------------------------------------------------------------|------|
| Patients whose disease was of more than two years standing,..... | 76   |
| Restored,.....                                                   | 20   |
| Much improved,.....                                              | 4    |
| Improved,.....                                                   | 3    |
| Stationary,.....                                                 | 44   |
| Died,.....                                                       | 5—76 |

## RECAPITULATION.

|                                                |        |
|------------------------------------------------|--------|
| Patients in the Asylum, 3d Mo. 1st, 1835,..... | 57     |
| Received since,.....                           | 51—108 |
| Discharged or died,.....                       | 62     |
| Leaving in the Asylum,.....                    | 46—108 |

Of the sixty-two patients discharged, there were

|                     |      |
|---------------------|------|
| Restored,.....      | 28   |
| Much improved,..... | 10   |
| Improved,.....      | 6    |
| *Stationary,.....   | 10   |
| Died,.....          | 8—62 |

\* Of the ten discharged Stationary, nine had been afflicted with insanity for many years, and the other was idiotic.

Of those at present in the house, there are

|                     |       |
|---------------------|-------|
| Restored,.....      | 7     |
| Much improved,..... | 5     |
| Improved,.....      | 3     |
| Stationary,.....    | 31—46 |

\* Most of these are cases of upwards of ten years standing.

It will be observed that the proportion of those cured at the institution within the past year, considerably exceeds that of any former year. This is to be mainly attributed to the increased remedial means, which, in accordance with the improvements of the age have been introduced in the Asylum.

Of all the disorders to which the human frame is liable, that which is termed *Insanity*, although most interesting, on account of its deranging the operations of the mind, and involving the exercise of the reason, has been strangely neglected. Instead of regarding it, as it really is, strictly a morbid state of some of the physical organs, and the deranged manifestations of mind merely the symptoms of that state, it has been too common to look upon it as an unintelligible malady of the immaterial existence itself; and the unhappy lunatic has been left, with a simple provision for his animal wants or comforts, a victim to the idle and ignorant belief that his disease was immedicable, and must be left to the healing virtue of time, and a straight-jacket. Happily for the afflicted inmates of the Asylum, a disposition has ever been manifested by those to whom its management has been intrusted, to place within their reach, as far as the resources of the institution will admit, most of the remedies which experience has proved best calculated to remove or mitigate their pitiable condition. During the past year much pains has been taken to increase the facilities for the proper moral treatment of the patients, and there can be no doubt, that the large proportion of cures among those who had been for years, suffering in an almost hopeless state of insanity, is to be greatly ascribed to the increased number of means which have been supplied, to be used under the direction of those qualified to prescribe them. When contemplating the powerful influence exercised by the physical organization over the mental operations, as exhibited in the raving delirium of a person labouring under acute inflammation of the brain; and the direct and speedy effect produced upon the mind by remedies addressed immediately to the diseased organ; we can form some tolerably correct judgment of the reciprocal reaction of the mental upon the material part, and cannot but be convinced, that amusement, employment, or whatever is calculated to soothe or divert the intellectual excitement are as much proper and legitimate prescriptions, as the use of calomel, opium, or the lancet; and every conscientious Physician, in treating those depending for restora-

tion to health upon his skill, will feel the absence of the one, as much as he would the loss of the others. The great benefit which has resulted from the improvements made within the past year, gives reason to believe that no effort will be spared still further to increase the resources of the Asylum in the means best calculated to remove or relieve the awful malady with which its patients are afflicted.

Eight deaths have occurred in the Asylum during the past year, being about 7-4ths per cent. All of these but two were patients brought to the institution during the year, after they had been long suffering under their various diseases and been subjected to active medical treatment. Nos. 385 and 407 had been residents at the Asylum for a considerable length of time, they were both in the seventy-first year of their age, the former died instantaneously of Apoplexy, the latter died of Gastritis after a protracted sickness. Nos. 421 and 471 died of Inflammation of the Brain after a few days' residence in the Asylum. No. 398 died of Paralysis aged 38 years. No. 457 died of Mania à Potu aged 63. No. 448 died of Tumor in the Brain aged 34. No. 454 died of Inflammation of the Brain and Gastritis combined, aged 45 years.

Of the forty-six patients now in the Asylum, fifteen have been afflicted with Insanity upwards of twenty years, sixteen upwards of ten years, seven upwards of five years, two between one and two years, and one rather less than one year. Three of them are above seventy years of age, six between sixty and seventy, fourteen between fifty and sixty, twelve between forty and fifty, six between thirty and forty, and five below thirty.

The most of the old patients who have been long residents in the institution, with the exception of that affection of the brain which prevents the right exercise of reason, enjoy uninterrupted health throughout the year, and are generally comfortable and contented. There are a few whose disease is periodical, and who, except when suffering under an attack, are capable of performing many duties about the establishment, and thus rendering their residence there both useful and more agreeable: to these, the quiet, and regulated discipline of the house, insure the rational enjoyment of their mental powers, during a much larger portion of their time than they could possibly realize if exposed to the usual cares and excitement of domestic life.

It is of the utmost importance to the welfare of that portion

of our fellow creatures who may be afflicted with diseases depriving them of the use of their reason, that those who have the charge of them, should be fully aware, that the surest and most expeditious plan which can be pursued, to restore them to health, and the enjoyment of their rational faculties, is to place them, as soon as practicable in some institution, prepared for the proper treatment of such cases, where an uninterrupted course can be pursued, calculated, as far as human means can effect it, to remove the causes of their disease, and bring them back to a condition in which they can again enter into the enjoyment of life, and engage in its various duties. Experience has so fully established the truth of this, that it cannot be too urgently advised, that no time should be unnecessarily lost; for the probability of a cure being effected is greatly increased by promptly subjecting the patient to proper restraint and medical treatment.

CHARLES EVANS, M. D.

Edward Yarnall, No. 39 High street.

*Attending Physician,*

Dr. Charles Evans, No. 102 Union street.

*Resident Physician,*

Dr. Robert R. Porter.

*Superintendents,*

John C. and Lætitia Redmond.

*Managers,*

Jacob Justice,  
Charles Allen,  
Joel Woolman,  
Joseph R. Jenks,  
Timothy Paxson,  
William Burrough,  
Isaiah Hacker,  
John G. Hoskins,  
Thomas Bacon,  
Edward B. Garrigues,

William Hillis,  
Edward Yarnall,  
Samuel B. Morris,  
George R. Smith,  
Isaac Collins,  
James R. Greaves,  
John Richardson,  
Lindzey Nicholson,  
Thomas Wood,  
Ephraim Haines.

---

EDWARD B. GARRIGUES, Corner of Sixth and Spring Garden street, is authorized to receive the money for the board of patients, from those persons to whom it is inconvenient to call on the Superintendent.

### OF THE ADMISSION OF PATIENTS.

I do hereby certify, from my own knowledge that  
of aged years, is in a  
state of insanity, and proper to be received into a house pro-  
vided for the relief of persons of that description.

1. How long has the patient been inflicted with insanity?

2. What medical, or other means have been used ?

3. Has the patient shown any disposition to injure him or herself or any other person?

4. Does any other complaint exist?

5. What other circumstances have occurred tending to throw light on the case?

M. D.

Previous to the admission of such patient, an examination shall be made of the case, by the attending or one of the consulting physicians, and his certificate obtained that such person 'has been examined by him, is found to be deprived of the use of his or her reason, and may with propriety be admitted as a patient into the Asylum : ' and the following bond shall be signed by two persons, as sureties, (one of whom must reside in or near Philadelphia,) for the regular payment of such board as may be agreed upon by the visiting managers.

Application is hereby made for the admission of \_\_\_\_\_ as a patient into the Asylum for the relief of persons deprived of the use of their reason; upon whose admission, we severally engage to provide a sufficiency of suitable clothing for \_\_\_\_\_ use whilst there; to pay to \_\_\_\_\_ Superintendent of said Institution, or to his assigns or successor in office \_\_\_\_\_ dollars \_\_\_\_\_ cents, per week, for \_\_\_\_\_ board; and not less than four weeks board to be paid under any circumstances, the said charge for board to be continued until \_\_\_\_\_ shall be regularly discharged, to make compensation for all damages done by \_\_\_\_\_ to the glass, bedding, or furniture, and to cause to be removed when discharged; and in the event of death whilst there, to pay the expenses of \_\_\_\_\_ burial.

*Witness our hands and seals, this \_\_\_\_\_ day of \_\_\_\_\_ A. D. 18 \_\_\_\_\_*

WITNESS,

(L. S.)

(L. S.)

If persons becoming sureties shall so prefer, the visiting managers may accept, in lieu of compensation for damages done by patients to the glass, bedding, or furniture, a small additional charge to the board agreed upon.

In case persons at a distance are desirous of having any information respecting the admission of a patient, their letters may be addressed to any of the managers, or to the Superintendent.

#### OF VISITERS TO THE ASYLUM.

When near relations or particular friends of patients desire to be admitted to see their connexions, application must be made to the superintendent; or, in his absence, to the attending physician, who may allow such visits when circumstances will admit.

As the general admission of visiters would be improper and injurious to the patients, no persons, except as above, shall be admitted to the apartments occupied by patients, unless introduced by a manager; but, on application to the Superintendent, they may be shown such parts of the building and appendages as are not so occupied.

## ANNUITIES.

A mode of obtaining contributions by annuities, not much known amongst us, but familiar to Friends in England, has been agreed on by the Contributors. On paying any sum of money to the Treasurer, for the use of the Institution, interest of six per cent. thereon, is annually to be paid to the annuitant; at whose decease, the interest money ceases, and the principal remains the property of the Asylum. This mode will probably be convenient to many who are desirous of promoting the designs of the Institution, and yet do not prefer making any considerable donation during their life time.

---

 FORMS OF LEGACY.
*I. Form of a Bequest of Personal Estate.*

“I give and bequeath to A. B. and C. D. and the survivor of them, and the executors and administrators of such survivor, the sum of \_\_\_\_\_ in trust for the use of an Institution near Philadelphia, known by the name of “The Contributors to the Asylum for the relief of persons deprived of the use of their reason,” and to be paid by the said trustees to the treasurer for the time being of the said Institution.

*II. Form of a Devise of Real Estate.*

“I give and devise to A. B., and C. D. and their heirs, all that \_\_\_\_\_ together with the appurtenances, to hold to them, the said A. B. and C. D. and the survivor of them, and the heirs of such survivor for ever; in trust nevertheless, for the sole use and benefit of an Institution near Philadelphia, known by the name of “The Contributors to the Asylum for the relief of persons deprived of the use of their reason,” and upon this further trust, absolutely to dispose of, and convey the same, either in fee, or for such other estate, and in such way and manner, as the Contributors to the said Asylum shall, at any meeting or meetings, order, direct and appoint.

## MANAGERS OF THE ASYLUM FOR 1836.

Classed to visit the Asylum weekly on Seventh day.
